

# SMARTDRIVE EXTENDED RECORDING

## PROTECTING YOUR FLEET AND DRIVERS **BEYOND DRIVING**

Video-based safety systems do a great job of telling you what happened when a high-impact event occurs. But, they don't always capture everything. That's where SmartDrive Extended Recording helps.

In addition to ensuring that you never miss a driving incident, Extended Recording ensures fleets gain additional pre and post insights to incidents and collisions. Fleets that use Extended Recording gain added significant savings through additional exonerations, resolving mystery-related damages, better supported claims investigations and improved adherence to non-driving operations.

SmartDrive Extended Recording continuously records video providing valuable context - helping fleets understand a variety of different situations not covered by the standard SmartDrive video platform, including:

- Thefts
- Compensation claims
- Driver compliance with company policy
- Non-driving situations, including deliveries and use of specialised equipment
- Minor accidents such as side-swipes that may not otherwise trigger the camera
- Attacks on a driver or unruly passenger behaviour
- Collisions
- Mirror strikes

SmartDrive Extended Recording, with unrivaled video recording capability, helps you capture and store an uninterrupted and comprehensive picture of events that happen to your fleet vehicles and drivers - whenever and wherever they occur.

# MORE INSIGHT MORE PROTECTION

## ACCURATE AND SUSTAINED VIEW OF WHAT ACTUALLY HAPPENS

- **Supports constant video coverage of fleet vehicles and behaviours of passengers and personnel while on the road**  
With up to 200 hours of recording, you get an actionable record of events for your vehicles and drivers while the vehicle is in operation
- **Protects your driver's well being and actions after an incident**  
Provides indisputable evidence of events surrounding - or in the vehicle; not-at-fault drivers can be exonerated
- **Shields your fleet from theft or unscrupulous insurance fraud**  
Security of an unattended vehicle is enhanced should the driver step away; quick assessment of what really happened on the road can help reduce insurance fraud and your liability

## EXTENDED RECORDING FEATURES

- **Up to 200 hours of continuous recording.** Fleets can choose two different configurations to support up to 100 hours or 200 hours of continuous recording - based upon two video channels.
- **Multiple camera video capture.** Extended Recording captures video from one to up to four cameras, providing valuable insight into what is occurring in and around the vehicle.
- **Order Events.** Fleets can order Extended Recording Episodes for a full day (24 hours). When the Extended Recording episodes are returned, each one is reviewed against SmartDrive's 75+ safety observations and scored according to the fleet's risk profile.
- **Ignition off configurable.** Extended Recording can be configured after the vehicle's ignition is off, capturing incidents after the driving is complete.
